

Medical Radiology Technician (M/F)

Reference number: #3DMA07

Publication date : 16/10/2020

Company: Visible Patient
Location: Strasbourg FRANCE

The company

Visible Patient is a company specializing in the digital sector for health. The company has developed a **medical image analysis laboratory providing a 3D model of patients from their CT-scan or MRI**. This service is for healthcare professionals. The 3D models give support for diagnosis and surgical planning. Located in the heart of Strasbourg, Visible Patient is a growing company having the worldwide number one marketing and sales partner in the field of surgery: Ethicon/J&J.

Main missions

As of January, we propose a **full-time open-ended contract** for an innovative position as radiology technician. This dynamic team is in charge of realizing the 3D patient models from CT-scan or MRI images by using image processing tools developed by Visible Patient. It is a new aspect of the radiology technician job highlighting the image analysis. Initial in-house training is proposed upon recruitment focusing on anatomopathological knowledge and image processing.

The position consists in:

- Analyzing CT-scan and MRI images.
- Realizing the 3D patient models.
- Using image processing tools developed by Visible Patient.
- Participating in software improvement projects.

Profil

We are looking for a person who can justify following diplomas:

Medical Radiology Technician or equivalent diploma.

This person should be comfortable with:

- Anatomy
- IT tools
- Theoretical knowledge of medical imaging techniques
- Good level in French and/or is mandatory

Beginners accepted.

*Compensation will depend on the candidate's profile and experience.
35 hours/week neither on call and nor weekend shift.*

Advantages: easy to settle in Strasbourg – meal voucher – private health insurance 100 % covered

You are passionate about healthcare technologies and you want to be part of a great adventure, come and join our team, we have been looking for you!
